

3 soveværelse Byhus til salg i Santiago de Calatrava, Jaén

16.000€

This 97m2 build Townhouse with on road parking offers a great opportunity to increase its value. The back patio - garden area could have access from a quiet pedestrian street to build a garage or to build a pool. Enter the front door into a small hallway with a room to the right which is now used as 1 bedroom, straight ahead is another small sitting area and next is a dining area with a small kitchen off it and the back door leading out of it. The outside has a lean-to with an old washing sink and a sloping space for a garden or patio. The back wall could be opened up for parking access or a garage. Upstairs there is a landing area off which there are 2 bedrooms. The front pitch of the roof has been recently replaced. This property offers good value for money and with reforms done could easily double its price. Must be seen to be appreciated.
