The house has two floors - the 2nd floor has two very large open plan rooms with high vaulted beamed ceilings - which are new . The ground floor has a kitchen, hallway , living room and 1 bedroom and bathroom . On a mezanone level there is a fairly newly constructed bedroom and bathroom .

The current layout is probably immaterial , as this house needs to be reconfigured . Turning the upper floor into a lovely open plan living / diner / kitchen woudl be a great option , and would leave the ground floor to be converted into 2/3 good size bedrooms with ensuite bathrooms .
