This visionary project redefines the concept of a modern urbanisation, offering an unparalleled lifestyle characterised by refinement, security and design ingenuity. Comprising a collection of 26 New Build Luxury villas, urbanization presents a harmonious blend of architectural brilliance and functional elegance. Designed by the visionary architect Ismael Mérida, the villas stand as modern marvels, each spanning three levels, including a solarium and basement, all united by a ground floor. Facing the cardinal directions of South, East, South East and West, the villas embrace the sun's journey, casting enchanting hues and shadows throughout the day.

What truly sets this project apart is its innovative approach to vehicular circulation. Beneath the residences, an ingeniously designed avenue accommodates the flow of cars, as well as access to private carports and garages, discreetly hidden from sight. From an aerial perspective, what captures the eye is not a network of roads, but a network of pedestrian pathways and lush landscapes, with vehicles tucked away underneath connecting to garages and carports. This captivating feature not only enhances the aesthetic appeal but also fosters an atmosphere of serenity.
