One Oak

, an exclusive development to enjoy everything that Malaga has to offer. Design, equipment, and a privileged environment are the three ingredients of this residential project, created to identify with the essence of the Costa del Sol and bring it into the 21st century. A real challenge for which the promoter has turned to its Puredesign philosophy, making a project come to life that takes advantage of its elevated location to offer panoramic views of the Mediterranean horizon and the urban center. Ideal for year-round living or as a second residence, just 10 minutes from Malaga airport.

In addition, One Oak is located in a strategic area, with excellent access to the A-7 highway and the main road networks of the province. From its train station, just 15 minutes from the center of Malaga, where you can enjoy a stroll through its historic center, go shopping on Calle Larios, or savor Malaga's cuisine on a sunny terrace. For shopping or taking the children to school, you can walk to Carrefour or Mercadona and the prestigious international school Sunny View School, as well as other primary and secondary education centers. The perfect location of One Oak provides an abundance of services, including health centers and a hospital, parks, and shopping centers. All of this, combined with its proximity to the capital, makes it an ideal option to enjoy all the good things about Malaga from a more natural and tranquil environment.

When designing it, the architects have chosen to prioritize terraces as a symbol of identity. Their curved shapes and large surface area determine the aesthetics of the whole, occupying a large part of the facade and facing outward through floor-to-ceiling windows. Thus, each of its 1 to 4-bedroom homes has been configured to enjoy outdoor living. The mild climate and light of Malaga invite you to make open-air plans throughout the year. Therefore, One Oak implements a concept of habitability that eliminates the boundaries between the outside and the inside. The terraces
