LADERA Design

The houses that we carry out have a high-class construction, through the use of top quality materials.

HIGHER QUALITY MATERIALS

The construction system of the houses is by means of reinforced concrete structure. The foundation has a waterproofing membrane in concrete.

The exterior walls have sufficient insulation to give homes a high energy rating. All exterior walls can be changed at the client's choice, that is, the decision of the client can be adapted to the client's needs.

On the roof waterproof sheet is placed to ensure its tightness towards the rain. The entire thickness of the roof is of high quality, being able to choose between a maximum range to suit the client.

All our houses have an installation of air conditioning ducts, pre-installation of gas heating and water pump for hot water.

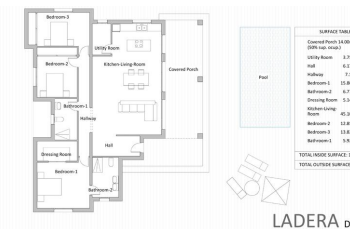

The exterior carpentry is made of PVC and double glass to ensure adequate insulation and energy efficiency.

The interior carpentry is colored wood at the customer's choice.

If the client wishes, the good construction of the chosen dimensions can be adapted.

The exterior dimensions of the house shown in the plan where it is located, performing everything necessary for good use and enjoyment of it.

All our project can be adapted to suit the client.
