

Jord til salg i La Codosera, Badajoz

84.950€

This building of 80 sq.m is situated near the small village of La Rabaza, about 9 km from the town of La Codosera. The plot is 1600 sq.m (just under 0.4 of an acre). I think of this house as a blank canvas for some one to renovate, using their own personal style. The plot is accessed from a small road which runs alongside the property as does the town water which could be connected. There is a well which would need pump and pipework putting in, but electricity is already connected. The land has cork oaks, cactus and pine trees and for the most part is reasonably cleared. This would make some one an interesting project!
