

Landhuis Te koop in Valencia de Alcantara, Cáceres

275.000€

This lovely old building was in its previous life a mill for the making of olive oil. It sits in about a hectare of land (about 2.5 acres), with two buildings. The first has kitchen, dining room, one ensuite bathroom and a 100 sq. M living room area. This fantastic large space is split over three levels and includes many of the original olive pressing machinery. There is an additional bedroom located above the dining room. Outside is a storage room which may have been used as a kitchen. This property comes with a separate building which is divided into 5 double bedrooms with their own ensuite. Some TLC would see them restored to their best. There is an additional barn which currently houses the old bread oven. The mill is set near a stream, which runs in the winter months. This mill has oodles of character, and would benefit from being lived in all year round, using the 5 bedroomed building to generate some income * price reduced by 25,000 EUROS *
