Energy Certificate

- The properties have Energy Certificate Rating A.

Roof

- Flat roofs, non-transitable, are waterproofed with two layers of 4 kg asphalt membrane each, combined with polyester fiber.
- They are divided into two areas: one of them allows for the installation of solar panels, while the other will have low-maintenance green areas. This includes a non-expansive soil layer and native vegetation.
- Rainwater is collected from the roof using drainage gutters.
- The foundation has been built by improving the ground through excavation and subsequent laying of selected soil, under the guidance and instructions of geologists.

Foundation and Structure

- The foundation will be made of reinforced concrete slab, in compliance with specific regulations from the Technical Council, Additionally, we will adhere to applicable Technological Standards, anti-seismic norms, and protection against Radon gas.
- The entire building structure is made of reinforced concrete, constructed using the SISMO construction system, guaranteed for 10 years. This system consists of a three-dimensional mesh of galvanized steel rods and thermal and
