

Land til salgs i Valencia de Alcantara, Cáceres

135.000€

A wonderful opportunity to stamp your personality on this finca just 6.5 km from Valencia de Alcántara. The existing 185 sq m building is at present connected to a reformed house on the next door finca; this could either be renovated where it is or knocked down and rebuilt in another part of the finca away from the other house (which is only used by the owners in the summer or at weekends). Sitting in approx. 14,000 sq.m (approx. 3.5 acres) the land around the house is fairly level and surrounded by the most part by stone walls. There are two gateways which lead down to the terraced area which would be suitable for growing vegetables, with a stream bordering the land at the bottom. There are cork oaks and olives on the land but there would be plenty of space to plant what ever you wanted !
