We have seen many impressive off grid properties but Finca Roble is up there with the best of them. This finca can be found tucked out of the way in the Sierra Nevada mountains in the most spectacular secluded location. Surrounded by oak trees with views of the Med, Finca Roble has not just one cottage but two. With nine bedrooms in total, you will be able to live in on and rent out the other. Both cortijos were built in the early 2000s to a very high standard. They are absolutely ready to move into. Apart from the main accommodation, there is a vast warehouse/garage that could easily be converted into yet more accommodation. Spring and acequia water feed in to an idyllic swimming pool where you can float below the apple blossoms. If you dream of not only being off grid but self-sufficient, then Finca Roble could not be more perfect. With over 8 hectares of land including flat pastures that have previously been planted with a great variety of veggies, self-sufficiency could not be easier to achieve. For anyone looking to be off grid in La Alpujarra, Finca Roble is a must see.
