

10 bedroom Villa for sale in Monóvar, Alicante

118,000€

The house has more than 350 metres of space between the ground floor and the first floor. In the ground floor there are two independent accesses for rooms (there is a part of the rooms already reformed and another part of the rooms to reform). On the ground floor there are two big rooms and some big living rooms, a big kitchen, a toilet, ... ETC. The kitchen and the toilet have a direct access from the street and are in an acceptable condition. There is a large living room which is divided into two spaces where you can gather more than 20 people and which gives access to the courtyard. In all parts of the house there are big stone walls, wooden beams, stone floors, ... etc that with a little TLC improve. In the patio you have a barbecue and a space of about 80 - 90 meters perfect to be able to give it a good use, a swimming pool, a games room, a small karaoke, ... at the main entrance there are two large garages independent of the main house with ample space to make a separate dining room, lounges, events, ... ETC. The house has a space for animals at the moment hens although it can be adapted to dogs, ... in the outside space there are ecological fruit trees that give fruit almost all year round if you like to live from your passion for nature. The space is located in an area close to natural landscapes, with very few neighbours and with the freedom of living in the countryside. Do not see the reform project as a problem but as an opportunity.
