

3 bedroom Cave House for sale in San Pedro de Alcántara, Málaga

640,000€

Excellent investment opportunity in San Pedro, one of the most promising and sought-after areas on the Costa del Sol. Plot of over 1,000 m², a size increasingly rare, located within walking distance of San Pedro Pueblo, which significantly increases its present and future value.

The land is currently undergoing reclassification to urban land (PGOM DAE approved, pending report from the Coastal Authority, ratification by the Junta de Andalucía, and publication in the BOJA), a key factor that ensures significant appreciation in the short to medium term.

Possibility to develop a high-end independent villa
Option to expand/build an additional floor
Ideal for both developers and long-term investors
Area with high residential demand and limited supply of large plots

A strategic investment in a consolidated location, with urban development potential and clear profitability prospects.
