

3 sovrum Lägenhet till salu i Fuengirola, Málaga

399.000€

The Complex offers a spectacular panoramic view of the Mediterranean and the mountains that will take your breath away.

We wanted to go a step further in this collection to make your life more pleasant, comfortable and relaxed.

The luxury of this collection is latent since the moment you enter through its exclusive Lobby with its panoramic lifts, BBQ area where you can enjoy with family and friends memorable moments. The infinity bubble pools with the sea as a perfect background, playground with a children's pool, and if you work from home you can always use the Business Center to have your meetings. To finish, the Sky Lounge will be the perfect closure to your day with the contemplation of a starry sky as a roof. All these services will make you feel ...

as if you were living in a 5 star hotel

enthouses, Apartments and Townhouses this collection, which includes 2, 3 and 4 bedrooms, open and covered terraces with areas for sunbathing and tropical gardens designed by our landscape architect are some of the surprises you will find when you enter your new home.

SISMO® system is the new construction, which also has the prestige of receiving the European Technical Certificate (DITE 01/0001) before any of their competitors, and its technology is marked worldwide as the construction of the future. SISMO® system has designed and produced this new technology and appropriate software for manufacturing its constructive system, which has also gained valuable and extensive experience in terms of technical application of these modules or system.

The basic structure of the SISMO® system building is a three-dimensional module. This module consists of a frame of galvanized steel wires. On the outside of the frame blanks that become a closed structure that can be filled with structural material (example: concrete) are introduced. Steel cables act as anchor armour and material finish.

The SISMO® system module is universal and can be adapted to every project, from foundations and cellars up to roof structures. The module is the perfect solution for all construction projects.
